CDMA transferring rate of I rate :-

```
unsigned long lastTime = 0;
const unsigned long interval = 10000; // 10 ms = 10000 µs

void loop() {
  unsigned long currentTime = micros();

  if (currentTime - lastTime >= interval) {
    lastTime += interval;  // better than = currentTime

    int data = analogRead(A0);
    Serial.println(data);
  }
}
```

CDMA transferring rate of Q rate :-

```
unsigned long lastTime = 0;
const unsigned long interval = 1/10000; // f = 10Khz

void loop() {
  unsigned long currentTime = micros();

  if (currentTime - lastTime >= interval) {
    lastTime += interval;  // better than = currentTime

    int data = analogRead(A0);
    Serial.println(data);
  }
}
```
